

MS Tribo Powder Systems

Efficiency and Reliability in Powder Coating Technology

ms

Efficiency and reliability in coating technology

With the new modular control concept, basic coating systems can be expanded or upgraded in a modular system.

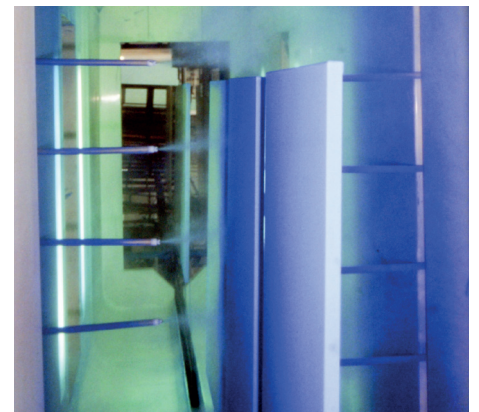

The gun unit consisting of control unit, connection kit, powder spray gun - in both MS Tribo or Corona MS methods - can be assembled based on configuration.

A modular concept with interesting expansion opportunities including lifting device control and part detection.

MS Tribo Powder Systems for automatic and manual powder coating

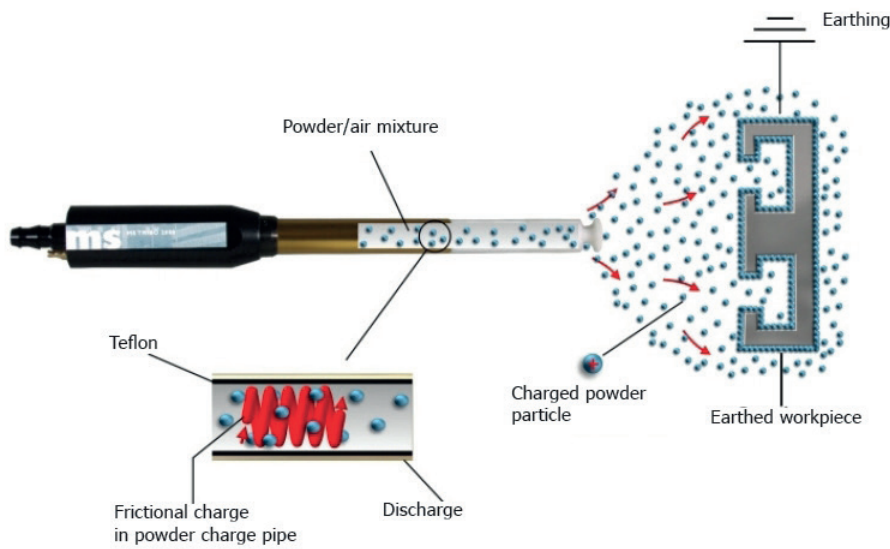

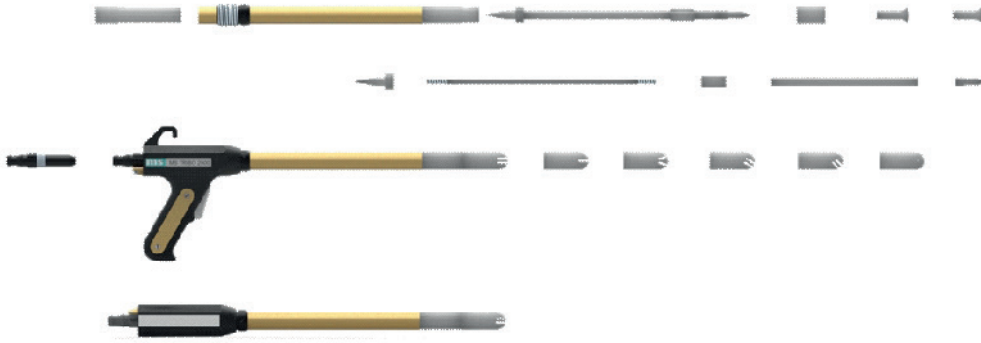

Outstanding features:

- Unique digital control and Tribo technology improves penetration
- capacity, surface finish and powder consumption
- Multifunctional nozzle systems for the finest spray patterns and uniform layer thicknesses
- Improved quality thanks to easier handling allows for smoother, better-looking surfaces with no orange peel effect
- Straightforward powder guiding in creases service life of wearing parts
- and allows for automated color change
- MS Modular expandable system from small series to large series requirements
